Summary

Results-driven Software Engineer with 2.8 years of experience in developing applications using Java, Spring MVC, and Spring Boot. Proficient in React.js for building responsive UIs and skilled in managing Linux deployments. Experienced in creating RESTful APIs, implementing CI/CD processes, and performing SLA calculations. Strong in client interactions requirements gathering, ensuring high-quality solutions.

Skills

Programming Languages: Java (Core Java, Advance Java), JavaScript

Frameworks & Architecture: Bootstrap, JQuery, Spring Boot, Spring MVC

Technologies & Tools: Lambda, Linux, Multithreading.

Databases: SQL, Hibernate (ORM), MySQL

SDLC: Agile/Scrum

Soft Skills: Client Interaction, Requirements Gathering, Problem Solving, Team Collaboration

Work Experience

Velox Solutions, Navi Mumbai | Team Lead

Jan 2023-Present

- Led client interactions to capture business requirements and managed the end-to-end project life cycle, ensuring successful project delivery within timelines.
- Implemented Spring MVC to develop robust, efficient data processing solutions adhering to MVC architecture, achieving streamlined application performance.
- Designed and implemented SLA calculation workflows, resulting in a 95% SLA compliance rate through optimized process management.
- Developed automated agents to manage email notifications, ticket auto-assignment, and closure, achieving a 99% reduction in manual effort.

Technologies: Java, Spring MVC, Hibernate (ORM), Multithreading, JavaScript, SQL, Bootstrap, jQuery, Linux

Education

B.Sc. in Information Technology | Mumbai University

Aug 2019 - June 2022

Project Work

ITSM-Help Desk -

- Designed and developed a multi-tenant SaaS-based helpdesk ticketing tool for multiple organizations, ensuring independent data environments and shared resources.
- Integrated LDAP Active Directory to enable seamless role-based login for users.
- Designed and implemented SLA reporting and problem ticket logic, along with service request functionalities using Spring MVC, JavaScript, and Bootstrap.

Active Directory Monitoring Tool -

- Developed a custom web-based Active Directory (AD) management tool, improving bulk user and group administration efficiency by 40%.
- Achieved a 30% reduction in AD monitoring and update time by implementing secure LDAP connections and queries within a single-agent framework.
- Conducted extensive R&D in Spring MVC, optimizing system performance by 25% to meet unique project requirements.

Asset Grid Asset Management Solution -

- Developed a comprehensive IT asset lifecycle management solution to ensure compliance and track IP-based assets.
- Implemented features for contract management, software license tracking, and monitoring of purchase orders.
- Enabled full visibility for software and hardware assets through a unified agent.
- Managed the overall project to streamline asset management processes across the organization.

Awards & Certificates

Java Full Stack Developer (2022):

- Completed java full stack developer course at anudip Foundation.

Rising Star Award (2024):

- Recognized for effective team leadership and consistently delivering projects on schedule.
